EPILEPSY WARNING

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain light patterns of backgrounds on television screens while playing computer games may induce an epileptic seizure in these individuals. Certain conditions may induce undetected epileptic symptoms in persons who have no history of prior seizures of epilepsy. If you or anyone in your family has an epileptic condition, consult your doctor prior to playing. If you experience any of the following symptoms while playing a computer game: dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions - IMMEDIATELY discontinue use and consult your doctor.

Overview

Tactical Ops – Assault on Terror is an action-oriented semi-realistic first-person shooter. **Tactical Ops – Assault on Terror** pits two teams, the elite Special Forces and the Terrorists, against each other in a battle to the death in different locations around the world. There are a variety of different scenarios available to play including the basic hostage rescue scenario, right through to C4 bombing missions and the theft of a prototype weapon. The locations where the scenarios are fought vary, from the towering dam of “Verdon,” to the snows of the Antarctic in “IcyBreeze,” or the remote church of “Monastery.” Money is rewarded for successfully winning a round. However, the losers will get a little bit to keep them healthy. This cash can be used to purchase weapons, items, and body protection to help your team in their struggle. Money can also be saved to buy bigger and better weapons to out-smart the opposing forces.

System Requirements

Minimum

CPU	Intel Pentium® II 450 Mhz or equivalent
Memory	64 MB RAM
Available HD Space	150 MB
CD-ROM Drive	4x or faster CD- or DVD-ROM
Audio System	DirectX® 8.0a (provided on CD-ROM) compatible sound card
Video System	16MB Video Card
Operating System	Windows® 98 / 98se / Me / 2000 and XP
Network and Internet Play	via TCP/IP (56K minimum speed)

Recommended

CPU	Intel Pentium® III 700 Mhz or equivalent
Memory	128 MB RAM
Available HD Space	700 MB
CD-ROM Drive	4x or faster CD- or DVD-ROM
Audio System	DirectX® 8.0a compatible sound card
Video System	16MB Video Card
Operating System	Windows® 98 / 98se / Me / 2000 and XP
Network and Internet Play	via TCP/IP (56K)

Running the Game

First, quit all other applications and insert the **Tactical Ops – Assault on Terror** game CD into your CD-ROM drive. The installation process will start automatically. Follow the instructions on the screen.

Once the game is installed and you have started it, you can either:

- start a practice session; or
- join a multiplayer game.

To start a practice session, click on Game > Start Practice Session. A box will pop up and you will be able to choose the map you want to play. You can change the settings for each map: difficulty level, time limit, number of bots, etc. Bots are characters controlled by the computer. They act of their own will, unless you give them specific orders. In a practice session, you are the only one able to give orders to bots. However, you may see/hear messages from partner bots asking for your help. It is up to you whether you want to help them or not. In any case, you are always the commander in a practice session. After an order has been given, all bots (or a specific bot depending on the order) will follow your instructions for a couple of minutes. They will then return to a “freelance” mode, unless you give them other specific instructions.

To join a multiplayer game, click on Multiplayer > Find Internet Games and refresh the list of servers (right-click and refresh). Make sure your Internet connection is working properly beforehand. You can then select which server you wish to play on, keeping in mind that the lower the ping, the better your connection to the server will be. Also, make sure you are not joining a server that is already full. In the case that all servers are full, you can start your own multiplayer session and wait for people to join you.

Configuration & Options

Controls

You can access the Controls Setup menu by clicking on Options > Preferences > Controls. Here are some basic controls:

FUNCTION	NOTES
Fire	Fire weapon, throw grenade, plant C4 bomb. Will jump to next player in spectator mode.
Alternate fire	Invokes your weapon's secondary function, such as sniper scope. Cycle through the two spectator modes (first person, third person).
Move forward	You can use this key when you are on the ground, in the water or when climbing a ladder.
Move backward	You can use this key when you are on the ground, in the water or when climbing a ladder.
Strafe left	Self explanatory.
Strafe right	Self explanatory.
Turn left	You can use this key when you are on the ground or in the water.
Turn right	You can use this key when you are on the ground or in the water.
Jump	Self explanatory.
Crouch	Self explanatory.
Mouse look	Self explanatory.
Look up	Self explanatory.
Look down	Self explanatory.
Walk	Move at slower, quieter pace (if you don't want others to hear your footsteps).
Strafe	Self explanatory.

Show Buy Menu	Takes you directly to the Buying menu.
Say	Allows you to type some text that can be read by everyone.
Buy primary ammo	Automatically buys a single clip of ammunition for the weapon currently in your hands.
Team say	Allows you to type some text that can only be read by your teammates.
Wave	Use this key if you want to wave at another player.
Next weapon	Changes to the next weapon available.
Previous weapon	Changes to the previous weapon available.
Throw weapon	Self explanatory.
Select best weapon	Self explanatory.
Use key	You will need this to get the hostages to follow you, open doors, defuse the C4 bomb, etc.
Night vision toggle	If you have brought a pair of night vision goggles, you'll need to press this key to activate / deactivate them.
Switch fire mode	Some weapons allow you to fire your weapon in more than 1 mode, usual Burst, Semi and Full automatic. You can play around with these different fire modes to see which one suits you best.
Switch flashlight	You always have your flashlight on you. Use this key to turn it off and on.

Settings

To change your personal settings, go to Options > Preferences > TO Settings. You will then be faced with the following options:

Automatic Reloading – If you prefer to have your weapon reloaded automatically after you have emptied your clip, you should check this option.

Hide Crosshairs – If you don't want your aiming crosshairs to be displayed, check this option. Although it is harder to play, it makes the game more tense and realistic.

Hide Widescreen – When you are dead, you can view the game in widescreen mode (default). If you wish to view it normally, check this option.

Hide Death Messages – If you don't wish to know when a teammate or enemy has died, check this option.

HUD Transparency Fix – If you are having trouble viewing the HUD or using night vision, check this option.

The Basics

Once you've joined a game, you will be asked to select which team you would like to join, either Special Forces or Terrorists. The numbers of players per team can be found on the Team Select screen.

If you start a practice session, you will be given an overview of your objective right after you have chosen your team.

If you have joined a multiplayer game and it is not the start of the round, you will start off dead until the next round starts. However, if it is the start of a round, you will be given a Briefing screen.

On the Briefing screen, you will be given an overview of objectives that you need to complete. This is the best period of time to buy your weapons. No one will be able to move for the first few seconds (this time may vary).

You can buy weapons, items, and body protection to assist you in the forthcoming round. It is recommended that you buy a weapon, ammunition and body protection until you have a good idea of what weapons and items work best for you. After a few seconds, the Briefing screen will disappear and you will be able to move around.

Objectives – Scenarios

Rescuing Hostages (Special Forces) – To get a hostage to follow you, go up to him and press the "Use" key. The hostage will now follow you until he is rescued, he is killed or you press the Use key on him again to tell him to wait there. The Terrorists need to stop the Special Forces from rescuing the hostages.

Planting the Bomb (Terrorists) – The bomb is part of your weaponry. Cycle through weapons to select the bomb (only one terrorist has the bomb). The Terrorists need to plant the bomb and guard it until it goes off at a bomb site designated by a red cross. The Special Forces need to prevent the bomb from being planted. If it is planted, the Special Forces should defuse it. If the terrorist who has the bomb gets killed, he will lose the bomb. Other Terrorists can pick up the bomb to plant it. The Special Forces cannot pick up the bomb.

Capturing the OICW (Terrorists) – The Terrorists are out to capture a secret weapon designed by the government. The Special Forces cannot pick up this weapon, only Terrorists can.

Escape (either team) – This scenario sees one of the teams fleeing for their lives while the opposing team tries to hunt them down.

When you start a game, you have \$1,000 in your pocket. Throughout the round, money is given out for a number of different reasons such as: killing enemies, winning the round, rescuing hostages or keeping evidence until the round ends. If you kill a teammate or a hostage, you will lose some money. The maximum amount of money you can have is \$20,000.

Money can be spent on weapons whenever you are standing at your starting point. You cannot buy anything outside the starting zone.

Heads-Up Display (HUD)

Note About Armour/Protection (Helmet, Bulletproof Jacket, Pads):

You can either buy a combination of these items, or full protection if you want to. Each item covers the obvious part of the body, and will wear down as it is shot. The armour display indicator will tell you how much of the protection is intact depending on the color – green being the best, red being the worst.

Here are some icons that will appear on screen in specific circumstances:

Escape Zone

A Terrorist Escape Zone. The Special Forces should guard it to stop the Terrorists from escaping.

Hostage Rescue Zone

The Special Forces should bring the hostages to these zones.

Bomb Zone

The Terrorists should plant the bomb in these zones.

C4 Bomb

This is displayed when you are carrying the C4 bomb.

Weapons

Throughout the round, you are able to buy bigger and better weapons as your stockpile of cash increases. Here are all of the weapons available in Tactical Ops – Assault on Terror:

Knife

GL 23

Raging Cobra

9F2 Glorietta

Black Hawk

AP II

Uzi

MP5 Navy

MP5 SD

AK 47

AS 12

Berg 509

BW SPS 12

M16a2

M4

M4m203

PH 85

SW Commando

M60

SR 90

RK3 Rifle

OICW

**C4 Explosive**

A highly explosive weapon which, if detonated, could put a huge hole in the ground. After it has been planted, Terrorists have around 55 seconds to get out of the blast radius.

Grenades**Smoke Grenade**

This will release clouds of smoke to reduce the vision of the enemies (and teammates). Smoke grenades are perfect for storming buildings.

**High Explosive (HE) Grenade**

An explosive device that is capable of killing anything within its blast radius.

**Flashbang**

A non-lethal grenade which will blind enemies for a few seconds before the assault. You can try to kill them while they are still blinded.

**Concussion Grenade**

This grenade will disorient anyone within its blast range. Watch out for the deadly shrapnel.

Evidence

Evidence is scattered all around the level. These items can be picked up, and, if kept until the end of the round, swapped for some cash.

**Cocaine - Weed**

These two types of drug are what the Terrorists steal to make huge profits to buy their weapons. If picked up and kept until the end of a round, you will be rewarded with money.

**Money**

Money is used the same way as the drugs. If you pick it up and keep it until the end of the round, you will be rewarded.

**Quick Start****Järjestelmävaatimukset**

Suoritin – Intel Pentium® II 450 MHz tai nopeampi

Muisti – 64 Mt RAM (suositus on 128 Mt tai enemmän)

Vapaa kiintolevytila – 150 Mt (700 Mt tai enemmän)

CD-asema – 4x-nopeuden tai nopeampi CD-asema tai 4x-nopeuden tai nopeampi DVD-asema

Äänijärjestelmä – DirectX® 8.0a (included) - yhteensopiva äänikortti

Näytönohjain – 16 Mt näytönohjainkortti

Käyttäjärjestelmä – Windows® 98/ 98se/Me/2000/XP

Pelaaminen verkon ja Internetin kautta – TCP/IP-verkon kautta (vähimmäisnopeus on 56 Kbit/s)

Pelin käynnistäminen

Sulje ensin kaikki muut sovellukset ja aseta sitten Tactical Ops – Assault on Terror -peli-CD-levy CD-asemaan. Asentaminen käynnistyy automaattisesti. Noudata näyttöön tulevia ohjeita.

Kun peli on asennettu ja olet käynnistänyt sen, voit:

- Start a practice session (käynnistää harjoittelupelin tai)
- Join a multiplayer game (liittyä monen pelaajan peliin).

Harjoittelupeli käynnistetään valitsemalla Game > Start Practice Session. Näyttöön tulee ikkuna, josta voit valita kartan, jota haluat käyttää pelaamiseen. Voit muuttaa kunkin kartan asetuksia. Asetukset ovat: difficulty level (vaikeustaso), time limit (aikaraja), number of bots (bot-hahmojen määrä) ja niin edelleen. Bots (Bot-hahmot) ovat tietokoneen ohjaamia hahmoja. Hahmot toimivat itsenäisesti, ellet anna niille erillisiä ohjeita. Practice session (Harjoituspelissä) vain sinä voit antaa bot-hahmoille komentoja. Saatat kuitenkin nähdä tai kuulla bot-kumppaneilta tulevia avunpyyntöviestejä. Saat itse päättää, haluatko auttaa niitä. Practice session (Harjoittelupelissä) sinä olet aina komentaja. Kun komento on annettu, kaikki bot-hahmot (tai komennon niin määrittäessä jokin tietty bot-hahmo) noudattavat ohjeitasi muutaman minuutin ajan. Tämän jälkeen bot-hahmot palaavat "freelance" ("omatoimiseen") tilaan, ellet anna niille muita ohjeita.

Multiplayer (Monen pelaajan) peliin liitytään valitsemalla Multiplayer > Find Internet Games ja päivittämällä sitten palvelinluettelo (napsauta hiiren kakkospainikkeella ja päivitä). Varmista etukäteen, että Internet-yhteys toimii oikein. Tämän jälkeen voit valita, mitä palvelinta haluat käyttää pelaamiseen. Muista, että palvelinyhteys on sitä parempi, mitä pienempi ping-luku on. Älä muodosta yhteyttä sellaiseen palvelimeen, joka on jo täynnä. Jos kaikki

palvelimet ovat täynnä, voit käynnistää oman multiplayer (monen pelaajan) pelin ja odottaa, että muut liittyvät siihen.

Kokoonpano ja asetukset

Ohjaimet

Pääset ohjainten asetusvalikkoon valitsemalla Options > Preferences > Controls. Alla on lueteltu muutamia perusohjaimia:

Fire (Tulitus): Aseella tulittaminen, kranaatin heittäminen ja C4-pommin asettaminen. Katselutilassa tulitusnäppäin vaihtaa seuraavaan pelaajaan.

Alternate fire(Vaihtoehtoinen tulitus): Aktivoi aseiden toissijaisen toiminnon, kuten kiikaritähtäimen tai äänenvaimentimen. Voit selata kahden eri katselutilan välillä (minä-tila, muu henkilö).

Move forward (Siirtyminen eteenpäin): Voit käyttää tätä näppäintä, kun olet maassa, vedessä tai kiipeät tikapuita.

Move backward (Siirtyminen taaksepäin): Voit käyttää tätä näppäintä, kun olet maassa, vedessä tai kiipeät tikapuita.

Strafe left (Vasemmalle väistö): Väistät vasemmalle.

Strafe right (Oikealle väistö): Väistät oikealle.

Turn left (Vasemmalle kääntyminen): Voit käyttää tätä näppäintä, kun olet maassa tai vedessä.

Turn right (Oikealle kääntyminen): Voit käyttää tätä näppäintä, kun olet maassa tai vedessä.

Jump (Hyppäys): Tällä näppäimellä hyppäät.

Crouch (Kyyristyminen): Tällä näppäimellä kyyristyt.

Mouse look (Hiirellä katsominen): Itsestään selvä.

Look up (Ylöspäin katsominen): Itsestään selvä.

Look down (Alaspäin katsominen): Itsestään selvä.

Walk (Kävely): Voit liikkua hitaammin ja hiljaisemmin (jos et halua muiden kuulevan askeleitasi).

Strafe (Väistö): Itsestään selvä.

Show Buy Menu (Ostovalikon näyttäminen): Pääset suoraan Buying-valikkoon (ostaminen).

Say (Puhu): Voit kirjoittaa tekstiä, jonka muut näkevät.

Buy primary ammo(Ensisijaisten ammusten ostos): Ostaa automaattisesti yhden lippaan kädessäsi olevaan aseeseen.

Team say (Puhu joukkueelle): Voit kirjoittaa tekstiä, jonka vain joukkueen jäsenet näkevät.

Wave (Vilkuta): Käytä tätä näppäintä, jos haluat vilkuttaa toiselle pelaajalle.

Next weapon (Seuraava ase): Vaihtaa seuraavaan valittavissa olevaan aseeseen.

Previous weapon (Edellinen ase): Vaihtaa edelliseen valittavissa olevaan aseeseen.

Throw weapon (Heitä ase): Itsestään selvä.

Select best weapon (Valitse paras ase): Itsestään selvä.

Use key (Käytä avainta): Tällä toiminnolla saat panttivangit seuraamaan itseäsi, voit avata ovia, purkaa C4-pommin ja niin edelleen.

Night vision toggle (Yönäön vaihto): Jos olet ostanut yönäkölasit, tällä näppäimellä voit ottaa ne käyttöön tai poistaa ne käytöstä.

Switch fire mode (Tulitustilan vaihto): Joissakin aseissa on monta tulitustilaa. Yleensä tulitustilat ovat kertalaukaustila, puoliautomaattitila ja täysautomaattitila. Kokeile, mikä tulitustila sopii itsellesi parhaiten.

Switch flashlight (Taskulamppunäppäin): Taskulamppu on aina mukana. Tällä näppäimellä voit kytkeä sen päälle tai pois päältä.

Quick Start

Systemkrav

CRU – Intel Pentium® II 450 MHz eller högre

Minne – 64MB RAM (128MB eller däröver rekommenderas)

Tillgängligt utrymme på hårddisken –150MB (700MB rekommenderas)

CD- ROM-enhet – 4x eller snabbare CD- ROM, eller 4x eller snabbare DVD- ROM-enhet

Ljudsystem – DirectX® 8.0a (included)-kompatibelt ljudkort

Videosystem – 16MB videokort

Operativsystem – Windows® 98/ 98se/ Me/2000/ XP

Nätverks- och Internet-spel – via TCP/ IP (56K minimum hastighet)

Spela spelet

Stäng först av alla övriga applikationer och sätt i CD-skivan med spelet Tactical Ops – Assault on Terror i din CD-ROM-enhet. Installationsprocessen startar automatiskt. Följ anvisningarna på skärmen.

När du har installerat spelet och startat det, kan du antingen:

- Start a practice session (Starta ett träningsspel); eller
- Join a multiplayer game (Delta i ett spel för flera spelare).

Om du vill starta ett träningsspel, klickar du på Game > Start Practice Session (Spel > Starta träningsspel). En ruta öppnas. Här väljer du vilken karta du vill spela. Du kan ändra inställningarna för varje karta: difficulty level, time limit, number of bots (svårighetsgrad, tidsgräns, antal "bottar"), osv. Bots ("Bottar") är figurer som kontrolleras av datorn. De har en egen vilja, om du inte ger dem särskilda order. I ett practice session (träningsspel) är det bara du som kan ge order till "bottar". Du kan emellertid se/ höra meddelanden från medspelare "bottar", som ber dig om hjälp. Det är upp till dig, om du vill hjälpa dem eller ej. Hur som helst, det är alltid du som för kommandot under ett practice session (träningsspel). När du har gett en order, följer alla "bottar" (eller en speciell "bott" beroende på ordern) dina instruktioner under några minuter. De återgår sedan till ett "freelance" ("frilans")-läge, om du inte ger dem andra särskilda instruktioner.

Om du vill delta i ett multiplayer (spel för flera spelare), klicka då på Multiplayer > Find Internet Games (Multiplayer > Leta efter spel på Internet) och uppdatera listan över servrar (högerklicka och uppdatera).

Kontrollera i förväg att din Internet-uppkoppling fungerar som den ska. Sedan kan du välja (markera) vilken server du vill spela på. Kom dock ihåg, att ju lägre

ping, desto bättre är din serveruppkoppling. Kontrollera också att du inte kopplar upp dig till en server som redan är full. Ifall alla servrar är fulla, kan du starta ett eget multiplayer (spel för flera spelare) och vänta tills andra spelare gör dig sällskap.

Konfigurering & Alternativ

Kontroller

Du kommer åt menyn Inställning av kontroller genom att klicka på Options > Preferences > Controls (Alternativ > Inställningar > Kontroller). Nedan följer några grundkontroller:

Fire (Skjuta): Avlossa vapen, kasta granat, plantera C4-bomb. Hoppa till nästa spelare i åskådarläge.

Alternate fire (Alternativ avlossning): Utlöser ditt vapens andrahandsfunktion, exempelvis räckvidd för krypskytt, ljuddämpare. Bläddra genom de båda åskådarlägena (första person, tredje person).

Move forward (Gå framåt): Denna tangent kan du använda när du är på marken, i vattnet eller klättrar på en stege.

Move backward (Gå bakåt): Denna tangent kan du använda när du är på marken, i vattnet eller klättrar på en stege.

Strafe left (Beskjuta vänster): Självförklarande funktion.

Strafe right (Beskjuta höger): Självförklarande funktion.

Turn left (Sväng åt vänster): Denna tangent kan du använda när du är på marken eller i vattnet.

Turn right (Sväng åt höger): Denna tangent kan du använda när du är på marken eller i vattnet.

Jump (Hoppa): Självförklarande funktion.

Crouch (Gå hopkrupen): Självförklarande funktion.

Mouse look (Musutseende): Självförklarande funktion.

Look up (Se upp): Självförklarande funktion.

Look down (Se ned): Självförklarande funktion.

Walk (Gå): Gå i långsammare, smygande takt (om du inte vill att andra ska höra dina fotsteg).

Strafe (Beskjut): Självförklarande funktion.

Show Buy Menu (Visa Köp-meny): Tar dig direkt till Köp-menyn.

Say (Säg/läs): Gör att du kan skriva text som alla kan läsa.

Buy primary ammo (Köp huvudammunition): Köper automatiskt ett enstaka magasin av ammunition för det vapen som du för tillfället använder.

Team say (Laget säger/läser): Gör att du kan skriva text som endast dina lagkamrater kan läsa.

Wave (Vinka): Använd denna tangent om du vill vinka till en annan spelare.

Next weapon (Nästa vapen): Byter till nästa vapen som är tillgängligt.

Previous weapon (Föregående vapen): Byter till föregående vapen som är tillgängligt.

Throw weapon (Kasta vapen): Självförklarande funktion.

Select best weapon (Välj det bästa vapnet): Självförklarande funktion.

Use key (Använd tangent): Du behöver denna för att kunna befria gisslan, öppna dörrar, desarmera C4-bomben osv.

Night vision toggle (Mörkeromkoppling): Om du har köpt ett par mörkerglasögon måste du trycka på den här tangenten för att aktivera/avaktivera dem.

Switch fire mode (Växla avlossningsläge): Somliga vapen kan du avlossa i mer än ett läge, oftast i Salva, Halv- och Helautomatiskt. Du kan växla mellan de här olika avlossningslägena för att se vilket som passar dig bäst.

Switch flashlight (Tänd/släck ficklampa): Du har alltid din.
